

Health Care

The Facts:

What We Know

- African-American and Latino residents in the U.S. have been [three times as likely to contract COVID-19 and almost two times as likely to die from the virus](#).
- [Communities at greater risk for COVID share social and economic factors that pre-date the epidemic](#) including: Living in crowded housing, working in essential fields, inconsistent access to healthcare, chronic health conditions, and stress.
- From 2011-2016, [Black women experienced roughly 42.4 deaths per 100,000 live births](#) on average compared to 13 deaths for white mothers; American Indian/Alaskan Native women experienced 30.4 deaths on average in the same time frame.
